

Organisation

Head of Course: CUC
International Centre for Geotechnics and Underground
Construction, CH-7320 Sargans, www.icguc.org

Date: 5th to 7th October 2010

Registration: before 01st September 2010

Course Location: VersuchsStollen Hagerbach AG
Polistrasse 1, CH-8893 Flums Hochwiese

Application: Through the application form on the EFNARC Website
www.efnarc.org

Fees: CHF 3'700.— per person
CHF 3'200.— EFNARC-members
Fee includes

- course tuition by CUC providing a summary of all contents of the certification
- assessment of participants as basis for certification
- certification by EFNARC and publication on EFNARC Website

Course fees are payable to CUC and must be paid in advance of the course.

Accommodation: Hotel accommodation is arranged on behalf of the participants. Meals and transfers from the hotel to the Test Gallery are included in the price of the course, however transfers to and from the airport and cost of overnight stay at the hotel are not included.

Cancellation: Cancellations are only accepted in written form and must be received by CUC a minimum 21 days before the course starts. In all other cases the course fee cannot be refunded.

EFNARC Nozzleman Examiner Certification

5th to 7th October 2010

Target Group: Experts with considerable experience in sprayed concrete application

Course Location: VersuchsStollen Hagerbach AG,
Polistrasse 1, CH-8893 Flums Hochwiese
Switzerland

Phone: +41 (0)81 / 734 14 14 Fax: +41 (0)81 / 734 14 05

E-mail: info@hagerbach.ch

EFNARC Nozzleman Certification Scheme

Sprayed concrete applications are one of the most essential activities in underground construction. The nozzleman has significant influence during the last production step of the sprayed concrete; controlling the quality of the sprayed concrete and also the economical outcome for the contractor.

EFNARC is the first organisation to develop guidelines for the Certification of Nozzlemen for wet sprayed concrete application which is most common in underground constructions.

On behalf of **EFNARC** the International **C**entre for Geotechnics and **U**nderground **C**onstruction (**CUC**) is offering Examiner Assessment and Accreditation for the Nozzleman Certification Scheme.

The EFNARC Nozzleman Certification Scheme is not a Training Course; it will only offer certification to Nozzlemen who have already gained the necessary experience and can demonstrate their technical knowledge and practical ability. The Scheme has been developed in recognition that the Construction Industry requires a means of identifying expert Nozzlemen. The Scheme is currently limited to wet, robotic sprayed concrete and has been developed primarily for the European market, although it will have a wider application.

The Scheme will operate through National Examiners who will assess Nozzlemen for their theoretical and practical skills at their workplace. The first stage of the scheme is to identify and accredit suitable Examiners through the attendance of an EFNARC Examiner Assessment Course. Nozzleman Certification will follow the successful accreditation of Examiners.

Examiner Assessment is a two-day course though participants should arrive the evening before for an introduction to the course and evening meal.

Programme

Day 1. Arrival, 06.00 pm

Welcome, introduction to course procedure

Day 2. 08.00 am to 05.00 pm

Summary of theoretical issues of sprayed concrete applications, discussion

Assessment of practical application of sprayed concrete

Day 3. 08.00 am to 04.00 pm

Assessment of participants:

Theoretical (written test and oral examination)

Practical (assessment of nozzle man)
